

Practical Business School

[1]

Thanks to a range of training courses that for over 100 years have continued to reinvent themselves, the Practical Business School has succeeded in meeting the needs of a constantly growing public.

The thematic areas of the courses range from administrative areas to accounting, from languages to computing, from qualification courses to seminars on setting up your own business, right up to a series of specific workshops.

The school activities take place at Bergamo Sviluppo operational headquarters, where training classrooms, a computer lab and projection rooms are available. We launch these courses every year.
